About me

Hello! I am a beginner Python developer, carried away by the development of web applications and automation of tasks. I actively study Python, Flask, the basics of

databases and Git. I strive to apply the acquired knowledge to solve real problems and make a contribution to the team.

My skills

- Python (basics)
- Flask (creation of simple web applications)
- Html, css (basic understanding)
- Sqlite (working with databases)
- Git (code versioning)
- Web scrapping (data collection using BeautifulSoup)

Experience (projects)

Here are personal projects, educational work or internships.

Project 1: [password generator on Python]

password generator on Python

- Used technologies:
 1. ■ Back end: * python, flask
 2. ■ Password generation: * modules `random` and `string` from the standard Python library.
 3. ■ Fronth end: * html, CSS, javaScript (uses FETCH API to interact with a backend).

Project 2: [docsify | We make a site from the usual text]

docsify | We make a site from the usual text

- Used technologies:
 1. *Frontend*: HTML, CSS, JavaScript, Markdown
- [Contrast on GitHub](#)

Higher education

Samara Institute of Railway Engineers

- Higher
- End year: 2000
- Faculty: Electro-mechanical
- Direction/specialty: locomotives
- Specialization: "Management of the technical operation of locomotives"

Additional education

- [Git + GitHub. Full course](#)
- [Machine learning](#)
- [Applications and services for teachers](#)
- [SQL Start](#)
- [Virtual reality technologies](#)
- [Introduction to Linux](#)

- [Docsify | We make a site from the usual text](#)
- [Indie course by html and css](#)
- [Data marathon: first acquaintance with SQL and Python](#)
- [Security on the Internet](#)
- [Fundamentals of the theory of information](#)
- [Fundamentals of construction design Free](#)
- [All about cryptocurrencies \(BTC, ETH, DOGE, NFT\)](#)
- [Good, kind Python with Sergey Balakirev](#)
- ["Generation Python": Course for advanced](#)
- ["Generation Python": course for beginners](#)
- [Introduction to the architecture of computers. Elements of operating systems.](#)
