## About me

Hello! I am a beginner Python developer, carried away by the development of web applications and automation of tasks. I actively study Python, Flask, the basics of databases and Git. I strive to apply the acquired knowledge to solve real problems and make a contribution to the team.

## My skills

- Python (basics)
- Flask (creation of simple web applications)
- Html, css (basic understanding)
- Sqlite (working with databases)
- Git (code versioning)
- Web scrapping (data collection using BeautifulSoup)

## Experience (projects)

Here are personal projects, educational work or internships.

### Project 1: [password generator on Python]

password generator on Python

- Used technologies:
  1. ■ Back end: \* python, flask
  2. ■ Password generation: \* modules `random` and `string` from the standard Python library.
  3. ■ Fronth end: \* html, CSS, javaScript (uses FETCH API to interact with a backend).
- [Link to github](#)

### Project 2: [docsify | We make a site from the usual text]

docsify | We make a site from the usual text

- Used technologies:
  1. *Frontend*: HTML, CSS, JavaScript, Markdown
- [Contrust on GitHub](#)

## Higher education

- Higher
- End year: 2000
- Faculty: Electro-mechanical
- Direction/specialty: locomotives
- Specialization: "Management of the technical operation of locomotives"

## Additional education
