About me

Hello! I am a beginner Python developer, carried away by the development of web applications and automation of tasks. I actively study Python, Flask, the basics of databases and Git. I strive to apply the acquired knowledge to solve real problems and make a contribution to the team.

My skills

- Python (basics)
- Flask (creation of simple web applications)
- Html, css (basic understanding)
- Sqlite (working with databases)
- Git (code versioning)
- Web scrapping (data collection using BeautifulSoup)

Experience (projects)

Here are personal projects, educational work or internships.

Project 1: [password generator on Python]

password generator on Python

- Used technologies:
 1. ■ Back end: * python, flask
 2. ■ Password generation: * modules `random` and `string` from the standard Python library.
 3. ■ Fronth end: * html, CSS, javaScript (uses FETCH API to interact with a backend).

Higher education

Samara Institute of Railway Engineers

- Higher

- End year: 2000
- Faculty: Electro-mechanical
- Direction/specialty: locomotives
- Specialization: "Management of the technical operation of locomotives"

Additional education

Stepik Certificates

- [Machine parts](https://stepik.org/cert/3232986) <https://stepik.org/cert/3232986>
- [Engineering graphics for machine builders](https://stepik.org/cert/3225863) <https://stepik.org/cert/3225863>
- [Engineering graphics. ABC of an engineer](https://stepik.org/cert/3168015) <https://stepik.org/cert/3168015>
- [Modeling in Compass-3D for beginners](https://stepik.org/cert/3145503) <https://stepik.org/cert/3145503>
- [Engineering of the Future](https://stepik.org/cert/3128718) <https://stepik.org/cert/3128718>
- [Basic CTF Course](https://stepik.org/cert/3093601) <https://stepik.org/cert/3093601>
